ABOUT ME AND MY IDEAL PLACEMENT

I have a passion for data and maps. Specifically, the practical application and presentation of them both. I continue to hone my skills both professionally and on my own time. My ideal placement would allow me to manage and develop the implementation of organizational GIS tools to service people. This is because GIS enables others to increase their operating efficiency and productivity when analyzing and understanding spatial relationships themselves, and when presenting and communicating spatial relationships to others.

PROFESSIONAL EXPERIENCE

YORK REGION
GIS Technologist, *Nov 2014 - current*

I have been part of both the Analytics and Applied Mapping and Business Solutions sections of the GIS Branch. Working in groups and with teams of technical and non-technical personnel from various departments, I have implemented enterprise level technical solutions to service a wide variety of people. I continue to gain many new experiences in this position, including enterprise GIS hardware and software solutions and developing strong professional relationships.

NORTH FRONTENAC TOWNSHIP
IT Technician / GIS Coordinator, *Jan 2009 - Nov 2014*

As the authority for GIS in the municipality, I was responsible for the full spectrum of GIS initiatives. In this position I frequently collected, organized, maintained and managed the data, while producing digital and hard copy consumables for public reference, and for improved municipal decision making. Starting with a clean slate, I established the Township's GIS foundations, I created partnerships with other GIS authorities, and I planned municipal projects with all managers. I regularly assisted staff to enhance their own skills, confidence and performance. This invaluable experience has enabled me to deal with of a wide variety of technical problems, it has allowed me to foster working relationships with many parties, including various levels of government, and has given me the confidence to address a multitude of strategic GIS situations confidently and positively.

EDUCATION AND CERTIFICATION

GIS PROFESSIONAL   [2014]
GIS Certification Institute

UNIVERSITY OF OTTAWA   [2010 - 2013]
Select Masters Level Courses

UNIVERSITY OF TORONTO   [2008]
Bachelor of Science with Honours
Geographic Information Systems (major),
Economics (major), Applied Statistics (minor)
